

Cybersecurity risks are at an all-time high for small to mid-sized organizations. For years, many such organizations have relied on a perimeter model plus an ala carte approach to cybersecurity. But today's hackers are getting smarter, finding ways to breach perimeter security more often – and in less noticeable ways.

63%

of organizations have experienced at least one breach in the last 12 months.

50-100%
or more

the rate at which some cybersecurity insurance premiums are rising per year.

\$9.44 m

the average cost of cyberattack recovery for a business in the United States.

You can no longer afford a low intensity, go-it-alone approach to cybersecurity

Introducing Ceeva Shield

Ceeva Shield is a comprehensive approach to cybersecurity that protects your data and your organization.

- A cybersecurity expert to guide you on cybersecurity insurance questionnaires, business continuity plans, incident response documents, and in-depth training for your staff.
- The right tools, processes, and people to help you boost your security posture.
